

These colouring books started with a conversation about people colouring in during the Coronavirus lockdown. As all of my drawings start with line, I thought I might be able to help. So here they are.

This is one of a short series of short books. They're designed as A5 but can be printed out bigger if you like working large.

For your colour, use anything you like! Crayons, paints, collage, digital, embroidery – there are no rules. You don't even have to stay inside the lines!
